

LEADING LEVELS

Our unique Leading Levels are a proven process that we've established over time, which allows us to stand apart from any other metal building company. Below we break down the entire process of your unique project and why we're the top choice in metal buildings.

L1 PRICING

Once we secure the design and scope of work, we'll price out the entire project so you know exactly what to expect. We are 100% transparent in our pricing so you have no surprise fees or hidden costs.

L2 PLANNING

Our team will advise and take into consideration all of your wants and needs in your metal building request and put together an expert plan for your project. Your project is now assigned to a Project Manager and team of specialized designers and engineers.

L3 DESIGN

Our team of engineers and designers will work together to come up with an in-depth and integral design and engineered drawings for your new metal building. As the client, you are given access to your project through our unique Management Software, allowing you to have complete project collaboration and access to key milestones at your fingertips.

 We proudly use 100% Canadian-made materials in our buildings.

L4 ENGINEERING

Our engineers will then take your design and start the process of developing your building drawings and details exactly to the required scope of work ensuring the highest standards are met.

L5 FABRICATION

Your building goes from 2D to 3D in our fabrication shop – exciting stuff! Our buildings are manufactured in our fabrication facility in Ontario, and proudly made with 100% Canadian materials.

L6 DELIVERY & ERECTION ON SITE

Your building gets delivered directly to your site address, where our team unloads every piece carefully and begins the erection process through to build completion.

L7 PROJECT COMPLETION & VALUE-ADD

Your building is complete and ready for you to move in and get down to business! Our team will ensure your site is cleaned up of debris and ensure you're 100% satisfied. As an added benefit, we can also maintain your building should you need servicing after our warranty period.

 We proudly use 100% Canadian-made materials in our buildings.
